

**MAKE YOUR
OWN WATER
FROM AIR**

1. Makes Water From Air

Yes! You read that right. With Kara Pure, you can enjoy delicious alkaline and mineral-rich water from the air.

Water is everywhere in the air we all breathe, even in the driest deserts. However, it remains trapped in the atmosphere until the right conditions allow it to be released.

“

“The Earth’s air has ~12,900 billion tons of fresh water distributed all over the world with fast replenishment.”

Kara Pure captures the air around you inside the dispenser where it removes all the impurities from the air. The cleaned air then undergoes a special heat exchange and cooling process that leads to the point where air is condensed and water is generated.

2. Adds Natural Minerals to Water

Ca

Calcium
Bone
Health

Mg

Magnesium
Healthy Blood
Pressure

Li

Lithium
Mental
Wellness

Zn

Zinc
Immune
Support

Se

Selenium
Powerful
Antioxidant

Sr

Strontium
Reduce acidity

**Metasilicic

Healthy Skin

3. Delivers Healthy Alkaline Water

Water created with Kara Pure tastes better than regular tap water, but more importantly, it helps improve our wellness! How? Kara Pure delivers you with perfectly pH-balanced alkaline water. Thanks to the inbuilt ionizer, it separates water into acidic and alkaline, and enhances the newly created water properties through fortifying the water with 9.2+ pH alkaline minerals.

It's almost as if you're drinking a glass of water that just came out of the natural spring. Your body will thank you for it and so will your taste buds.

4. Always Clean & Never Stale

Kara Pure Water is purified through a multistage filtration and purification process.

Thanks to its UV-C sterilizer built-in the water reservoir, Kara Pure produces highest quality and purity drinking water. Low in bacteria and biological contaminants.

5. It purifies the air you breathe

With Kara Pure you not only will drink high-quality water, but will also breathe pure air. In fact, air purification is part of its water creation process.

Thanks to XX-level filtration system, Kara Pure cleans the air from impurities, heavy metals, particles, and extracts water from the air. After which the purified air is released back.

6. It's also a dehumidifier

Kara Pure is more than a air-to-water generator.

As Kara Pure produces water through capturing the humidity in the air, it also serves you as a dehumidifier. It effectively removes the excess water from your environment and prevents the buildup of mold that can result in a number of issues.

Create a more
comfortable living
environment with
Kara Pure.

7. Forget all about buying bottled water

Featuring the innovative, air-to-water filtration system, combined with a germicidal UVC tech, the Kara Pure delivers you pure, ionized, fresh drinking water, without the need to connect it to the water pipes and infrastructures.

Specifications

Power

110/240V AC 60Hz

Water Properties

Ionized, Mineral,
Antioxidant, Anti-bacterial

Weight

35kg (77)

Materials

Stainless Steel, BPA Free

Water Tank Capacity

Kara Pure collects and stores
water in a 2.5 gallons (~10L) tank
